

# Group Buy

## Solar Power in Numbers

*Combining several systems together into a group purchase allows H&H to offer quality solar installations at a very competitive price. In most solar group-buy programs, an administrator takes a share of the volume savings in exchange for organizing the program.*

*The Solar Harvest program instead reinvests these savings in local farm coalitions to help build a more resilient food system.*

*Farmers are no strangers to the sun; they use it every day to create the food we all rely on. They understand the importance of energy independence, stewardship, and caring for the earth's resources. Perhaps it should come as no surprise that a growing number of farms are incorporating solar into their operations.*

### About H&H

- *Wisconsin contractor since 1901*
- *Over 700 solar systems installed over the past decade*
- *High degree of professionalism and workmanship. Our systems are built to last*
